EXPERIENCE

Sales Gauge

Product Design & Digital Experience Associate

- Led end-to-end redesign and implementation of the company website using Squarespace and front-end customization, partnering directly with the founder to validate UX and information architecture decisions over a 3-week build cycle; increased monthly users by +162%.
- Redesigned site structure, navigation, and content hierarchy to improve usability and product discoverability, resulting in a 156% increase in user engagement .
- Identified limitations in an Excel-based sales pipeline and proposed a structured digital solution; designed and built a B2B sales pipeline system to improve deal tracking, workflow customization, and scalability for commercial use.
- Drove measurable business impact by improving digital presence and website performance, directly contributing to new company leads, customer acquisition, and expansion of client relationships

Emerson Hospital – AFA OBGYN

UX Strategy & Digital Marketing Consultant

- Spearheaded end-to-end digital experience and marketing initiatives for a healthcare organization, collaborating with clinical and design teams to improve patient engagement and strengthen brand presence across digital platforms.
- Led UX strategy for a commercial podcast initiative by defining content structure, episode frameworks, and interview systems to support audience growth and business development.
- Orchestrated media production and campaign execution, coordinating photoshoots and video sessions, selecting hosts, and managing logistics to deliver high-quality marketing assets efficiently.
- Redesigned website UX using Figma wireframes, improving information architecture, SEO, and content structure to enhance usability and patient navigation.
- Partnered with marketing and design teams to develop cohesive digital branding across web, social, and content channels, ensuring consistent user experience and messaging.
